

TRUTH IN SAVINGS

IMPORTANT MEMBER INFORMATION

The Truth in Savings Act (T-I-S) is a section of the Federal Deposit Insurance Corporation Improvement Act of 1991. The National Credit Union Administration is charged with enforcing the act which applies to ALL credit unions.

The purpose of T-I-S is to promote and simplify comparisons among accounts at all financial institutions. T-I-S enables consumers to make informed choices/comparisons among competing claims of financial institutions by requiring disclosure of the dividends rates payable on these accounts and the fees assessable against these accounts.

It is the intent of PARDA Federal Credit Union to maintain compliance with this federal law pertaining to full disclosure regarding the terms and conditions of all savings programs.

The following disclosure information illustrates the various savings alternatives available at PARDA Federal Credit Union.

The rate information sets forth certain conditions applicable to the accounts at PARDA Federal Credit Union as of April 1, 2012. This schedule is incorporated as part of this disclosure.

If you have any questions regarding any of the accounts offered at PARDA Federal Credit Union, please let a credit union representative assist you. Savings at PARDA Federal Credit Union are federally insured up to \$250,000 by the National Credit Union Administration, a U.S. Government agency.

Nature of Dividends

Dividends are paid from current income and available earnings, after required transfers to reserves at the end of a dividend period.

Compounding and Crediting

Dividends will be compounded monthly and will be credited monthly. For this account type, the dividend period is monthly, for example, the beginning of the first dividend period of the calendar year is 01/01/12 and the ending date of such dividend period is 01/31/12. All other dividend periods follow this same pattern of dates. The dividend declaration date follows the ending date of a dividend period, and for example is 02/01/12. Accrued dividends will be paid when you close your account.

Balance Computation Method

The average daily balance requires the application of a periodic rate to the average daily balance in the account for the average daily balance calculation period. The average daily balance is determined by adding the full amount of the principal in the account for each day of the period and dividing that figure by the number of days in the period.

Tiered Rate Method

The stated dividend rate that corresponds to the applicable share balance tier will be paid on the entire account balance when the average daily balance falls into that tier for the dividend period.

Accrual on Noncash Deposits

Dividends will begin to accrue on the business day you deposit noncash items (e.g. checks) to your account.
